## Managed Data Centre Solutions

---

Colocate your critical data in fully managed data centres for the ultimate connectivity between systems.

**DIGITAL  
SENSE**

An **OvertheWire** Company 

# DSColo allows you to optimise your your critical IT infrastructure by colocating in one of our professionally managed data centres.

Whether you need more space for your data needs, or the increased speed and reliability that comes from your systems being closely linked, DSColo delivers.

With DSColo you can improve your overall connectivity and reduce latency by establishing a data centre presence in Brisbane or house data in close proximity to third-party service providers. Even better, you can easily add more space to your plan as your data needs grow.

Our colocation services deliver excellent uptime and advanced security that's expertly managed for you by the Digital Sense team. You can use one of our Digital Sense data centres or access space in one of our third-party data centres.

## Key Features

Data centre managed 24/7

High uptime (99.99%)

World-class security

Dual power supply – back-up generators run when power grid is down

24-hour access

Remote hands service when you need work completed for you

High speed connectivity

Data and cabling supplies as required

# How it works

DSColo gives you all the advantages of a data centre without having to invest in your own. From secure physical housing for your equipment to safety, security and service, DSColo gives you the same infrastructure as a world-class data centre.

DSColo services can be offered in either our data centres or one of our Digital Sense managed third-party facilities.

#### Amenities at our data centres include:

- Delivery bay/run-up room
- Crash carts and trollies
- Lockers
- Physical disaster recovery facilities
- Data cabling and supplies
- WiFi
- Car parking on-site

#### Your business will have access to a range of remote hands services including:

- Power-cycling equipment
- Cable patching
- Equipment installation (terms & conditions apply)
- Plugging in KVM switches
- Backup tape changes
- SAN HDD swap-out
- Visual rack auditing/checks (no photography)
- Cross-connect installations
- A+B Redundant power feeds to each rack

You can also supercharge your cloud infrastructure by bundling DSColo with our other cloud services.

*DSColo gives you all the advantages of a data centre without having to invest in your own.*

## About Digital Sense
